

Role: Back End Developer**Location: Rijeka, Croatia (Remote Work)**

We are looking for a Back-End developer responsible for building Java applications. This includes anything between complex groups of back-end services and their client-end (desktop and mobile) counterparts. Your primary responsibility will be to design and develop these applications, and to coordinate with the rest of the team working on different layers of the infrastructure. Thus, a commitment to collaborative problem solving, sophisticated design, and product quality is essential.

Years of experience: 5-8 years

Skills

- Proven hands-on Software Development experience and solid understanding of object-oriented programming
- Proven working experience in designing and developing applications using Java, J2ee, Spring, Hibernate and Java EE platforms
- Object Oriented analysis and design using common design and architectural patterns
- Excellent knowledge of software and application design and architecture
- Profound insight of Java and JEE internals
- Excellent knowledge of Relational Databases, SQL and ORM technologies (JPA2, Hibernate)
- Experience in developing web applications using at least one popular web framework (JSF, Spring MVC, Struts etc.)
- Experience in Web service technologies (SOAP, REST, Apache CXF etc.)
- Experience with Scrum, Agile Process.
- Experience with Continuous integration.
- Commitment to Test Driven Development
- Basic understanding of JVM, its limitations, weaknesses, and workarounds
- Proficient understanding of code versioning tools, such as Git, Bitbucket
- Familiarity with build tools such as Ant, Maven, and Gradle
- Preferably Oracle certified Java professional (OCJP)

Responsibilities

- Understand and clarify user-stories and acceptance criterion with the Product Owner
- Write unit test cases of the user-stories in the Sprint Backlog
- Translate select user-stories and use cases into functional applications
- Design, build, and maintain efficient, reusable, and reliable Java code
- Ensure developed user-stories meet all the acceptance criterion and definition of done
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify bottlenecks and bugs, and devise solutions to these problems

What we Offer:

- Start-up environment and chance to work on unique products. Work on your own products - with possibility to raise seed investment
- Lean Start-up way of working which will make you successful in future

- Chance to earn equity based on performance
- Freedom to learn new technologies and work across different domains
- Onsite opportunity - depending on customer requirements
- Free Coffee and Fun environment
